## **International Conference on Patient Safety and Hospital Accreditation**

**(2025)**

### **Invitation Letter**

We are honored to announce that the International Conference on Patient Safety and Hospital Accreditation (2025) will be held on Saturday, May 24 to Sunday, May 25, 2025, and have the greatest pleasure in inviting you to attend.

This landmark event, which will take place in Shenzhen, China, a city renowned for its pioneering spirit and dynamic innovation, is organized by the Shenzhen Hospital Accreditation Research Center (SHARC), the International Society for Quality in Health Care (ISQua), and the Hong Kong Hospital Authority. Aiming to foster global collaboration in advancing healthcare quality standards and patient safety systems, the conference will be attended by over 700 healthcare leaders, policymakers, researchers, and industry innovators from more than 20 countries.

Since its establishment in 2020 as part of China's healthcare reform initiative, SHARC has achieved a historic milestone by obtaining triple accreditation from ISQua's International External Evaluation Association (IEEA) for its CIHA Standards (China's International Hospital Accreditation Standards), Surveyor Training Programme, and External Evaluation Organization, marking a transformative step in aligning China's healthcare practices with global benchmarks. Against this backdrop, this Conference is organized to serve as a pivotal platform to explore synergies between the Belt and Road Initiative in the enhancement of quality and safety in hospitals through external evaluation and accreditation, and the development of high-standard accreditation frameworks, ultimately contributing to equitable and resilient health systems worldwide.

Themed "Belt and Road Collaboration in Development of Optimal Healthcare Accreditation System to Improve Quality and Patient Safety", the Conference will delve into critical topics such as global patient safety challenges, AI-driven healthcare innovations, hospital performance optimization, and cross-regional strategies for health equity. Distinguished speakers will share best practices in Plenary Sessions from diverse contexts, offering actionable insights to address emerging issues like data interoperability, workforce training, and sustainable resource allocation. In addition, parallel Sessions will feature interactive workshops, policy round-tables, and case study presentations designed to bridge theory and practice.

We sincerely hope that you will accept our cordial invitation and look forward to seeing you in Shenzhen. Please refer to the attachments for details and arrangements of the Conference (Registration fee waived). Should you have any questions, please do not hesitate to contact us.
